PRODUCT DESCRIPTION

Designer: Tom Dixon

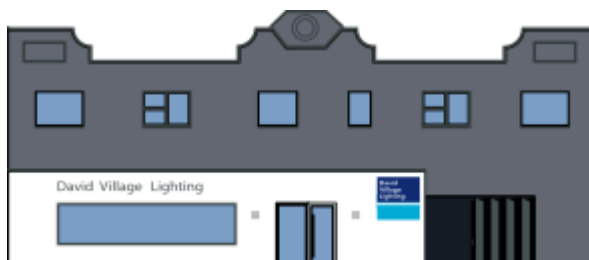

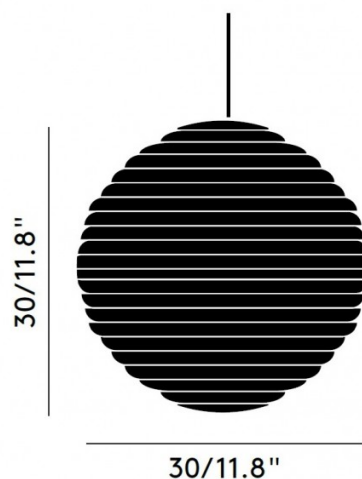

Tom Dixon Press Sphere LED Pendant

The Tom Dixon Press Sphere Pendant is crafted from clear glass that features gorgeous ripples, diffusing and refracting the inner light source. The lampshade is made by dropping molten glass at 1200°C before being pressed in pressurised iron moulds to create a thick and durable luminaire. Press Sphere produces a warm ambient glow that can be used independently or in clusters and linear rows depending on the needs of your interior.

The Press Sphere Pendant Light can be used in many environments, whether at home or in larger commercial spaces. This lighting solution can be used alone or can also be matched with other designs in the [Press Collection](#) to create a cohesive and aesthetically pleasing interior design scheme.
