PRODUCT DESCRIPTION

BuzziJet LED Pendant Light by BuzziSpace

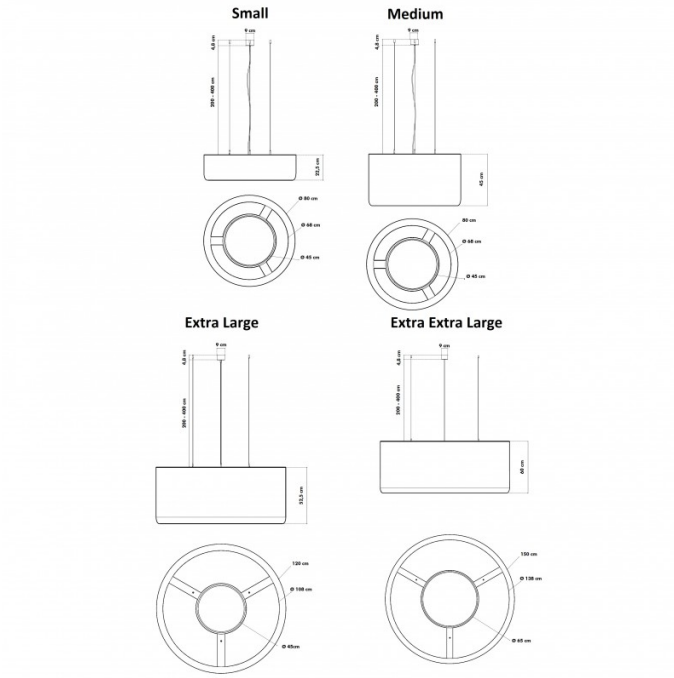

The BuzziJet pendant is a light that is designed based on geometric acoustics, being a simple design that is contemporary and minimalist. The big diameter allows sound waves to bounce back and forth and therefore softening noise levels. The shade is made from foam, creating a lightweight effect and is upholstered with fabric.

The BuzziJet pendant lamp helps noise levels of low, medium and high tones, being perfect as a main light in an office space or meeting room to reduce noise and provide effective illumination. The integrated LED light source is concealed, producing a diffused glow and is also dimmable so you can set the right light level for happy working.

The pendant light is available in 4 sizes and you can choose from a massive range of fabrics to personalise your BuzziJet. Please contact our Trade Team for more information and prices.
