PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Atlas Pendant Light

The Marset Atlas Suspension Light was designed by Joan Gaspar who aims to simplify design and challenge himself by moving away from the overly complex design comfort zone. Gaspar describes simplicity as a 'complicated task' as it creates focus on the functionality and materials. This can be seen in the design of the Atlas Suspension Light that features a blub that is encapsulated by a transparent polycarbonate shade.

The translucent finish of the shade chosen by Gaspar allows you to view the inside workings of the Marset Atlas spotlight and adds an industrial and minimalist aesthetic to a space. This modern suspension light provides a bright downward spotlight that would be ideal for above a workspace or bedside table.
