Astro Tacoma Twin Globe Wall Light

Astro Tacoma Twin Globe Wall Light is a wired-in wall light with two lamp holders, an IP44 rating, and a choice of Antique Brass, Matt Black, or Polished Chrome body finishes. This page covers the globe shade options, with White, Ribbed White, Ribbed Smoke, and Ribbed Clear shades available.

The globe shades give the Tacoma Twin a rounded glass profile, with the choice of plain or ribbed and smoke or clear finishes changing how visible the lamp appears within the shade. Use the White shade for a softer opal look, or the smoke and clear versions where more bulb visibility is preferred.

The Tacoma Twin Globe Wall Light is unswitched and dimmable depending on the lamps selected, with Class I earthed construction and no separate driver required. The shades are sold separately and must be selected with the wall light body. It can be used in bathrooms, hallways, bedrooms, dining rooms, or with other fittings from the Tacoma collection. Most suited to bathrooms, hallways, bedrooms, dining rooms, and wall-lighting schemes where a twin globe shade fitting is required.
