PRODUCT DESCRIPTION

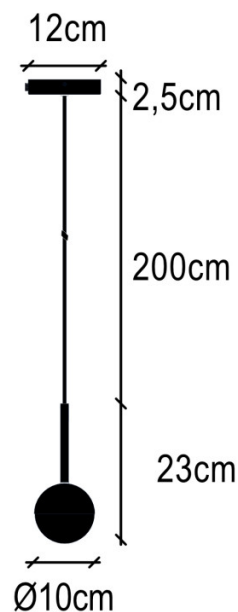

Designer: Says Who

Nordlux Contina Pendant Light

The Nordlux Contina Pendant light is a great example of simple but beautiful Scandinavian design. The Contina Pendant light has a slim, art-deco-style frame which holds a beaming, spherical opal glass ball. The rounded matte white glass hides the light source and creates a soft, diffused light through the space around it, the shade producing a remarkable glare-free finish. The bold, slender frame guarantees the pendant doesn't take up any more space than needed so the focus is only on the opal mouth-blown glass enhancing the room. Small details make this product. Carefully selected by Nordic designers, **Says Who**, they bring style and function to a home interior.

The light of the Contina Pendant Lamp is dimmable when used with a dimmable bulb producing different light intensities that affect the mood and atmosphere. Suitable for kitchens, lounges, bedrooms, dining areas and more, the Contina Pendant Light could be used standing alone for dramatic effect, or with multiple others for a modern, contemporary style.
