PRODUCT DESCRIPTION

Designer: Constance Guisset

Vertigo Small Pendant Light by Petite Friture

The style of the Vertigo Pendant Light has become an icon in design, and this small version carries on its legacy. The Vertigo Pendant Light has featured in an anthology of reputable collections like the Moma (The Museum of Modern Art) whilst also gaining significant recognition from the public. This show-stopper design has won a public award at the Villa Noailles in 2006, a Design Parade showcasing contemporary art creations.

With the Vertigo Pendant Light, Parisian designer Constance Guisset has created a fibreglass structure with lightweight, polyurethane, handmade ribbons which in turn allow its form to move and sway in the gentle air, creating unique, stunning images across the walls and ceilings of an interior. Aesthetically fragile and soft, the Vertigo Pendant makes a bold statement drawing anyone's eye when walking into a room. Amazingly, no two Vertigo products are ever the same, as each one falls delightfully in its own way, meaning you will have a truly one-of-a-kind product.

The small pendant light is one of three of this delightful, decorative design. With the smallest at 110cm diameter, the medium at 140cm and the large at 200cm, there is an array of sizes to browse to find your perfect piece. The Vertigo Small is available in five colours, and the [Vertigo Medium](#) and the [Vertigo Large](#) in more colour options, this design would match all sorts of spaces and colour schemes in an interior.

To celebrate the iconic Vertigo, Petite Friture is launching a limited edition yellow neon light. This addition of colour will add a pop of brightness to your interior decor and is part of a prestigious Pantone collection.

The Petite Friture Vertigo Pendant can be purchased with a 10m cable on request. Please [Contact Us](#) for further information and pricing.

PRODUCT SPECIFICATION
