### PRODUCT DESCRIPTION

**Designer:** Jordi Canudas

### Marset Dipping Light LED Ceiling / Wall Light

Marset Dipping Light LED Ceiling / Wall Light is a compact fitting that can be used on either the wall or ceiling, with a glossy blown glass globe and layered painted finish. Designed by Jordi Canudas, the Dipping Light began as an experiment with a lit bulb dipped repeatedly into paint. The result is a soft ringed effect across the glass, with the painted layers filtering the light rather than simply decorating the surface.

When lit, the glass softens the warm 2700K light and adds a subtle wash of colour around the fitting. When switched off, the globe still has a clear decorative presence, making it useful in places where a small wall or ceiling light needs to contribute visually during the day as well as at night. It works well beside a bed, along a hallway, in a living room, or repeated through a restaurant, bar, or hotel scheme.

This version is hardwired and includes an integrated LED, with Triac dimming for adjusting the light level through a compatible system. The shade is available in White, Green, Amber, Burgundy, Chocolate, and Cream, each paired with a Brushed Brass structure. Most suited to bedrooms, hallways, living rooms, dining areas, and hospitality interiors where a compact coloured glass light can give a soft, warm point of illumination.

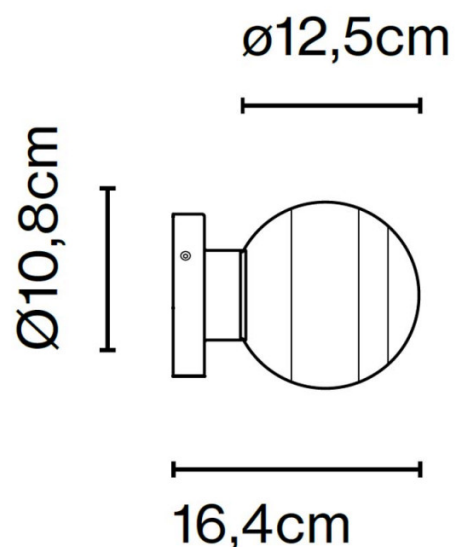

### PRODUCT SPECIFICATION

**Light Source:** 8.6W, 2700K, 765 Lumens

**IP Code:** 20

**Dimming:** Dimmable via Triac dimming.

**Dimensions:** Diffuser: Ø12.5cm  
Depth: 16.4cm  
Base: Ø10.8cm
