PRODUCT DESCRIPTION

Designer: Guillaume Sasseville

Lambert & Fils Mile LED Suspension

Lambert & Fils Mile LED Suspension was designed in-house and collaborated on with Guillaume Sasseville. The Mile Suspension provides bright and clear illumination to enhance your space, both upward and downwards. The direct and indirect light are separated by a 90° pivot to allow light to be directed where needed. It is a masterpiece of form and function, blending style and practicality to offer a truly versatile lighting solution for any space. A play on contrasts, Mile is part art installation and part utilitarian light. The use of linear LED technology and the cords clamped into the structure add to the weightless, almost levitating feel of the lamp.

Lambert & Fils Mile LED Suspension has been strategically made to be featured in both commercial and residential environments thanks to Miles's refined design and high-end finish making it stand out and adding a touch of elegance to any interior. Available in four colourways, the Mile LED Suspension is a striking visual feature which can be displayed above kitchen islands or a dining table.
