PRODUCT DESCRIPTION

Designer: Daniel Rybakken

Luceplan Millimetro LED Suspension

Combining a circular mirror finishes diffuser and a metal suspension rod, the Luceplan Millimetro is a contemporary and abstract luminaire. Designed by Daniel Rybakken this lighting solution boasts a 1mm thick diffuser which is attached to a metal stem and assists in projecting the illumination up towards the ceiling, where it is reflected back to cast an even glow. This indirect projection expertly provides a warm and calming brightness to your space and can be used in a variety of interiors.

A beautiful addition to living rooms, and hallways, kitchens and dining spaces - the Luceplan Millimetro LED Suspension can also be installed in commercial interiors such as hotels, restaurants and bars. The stem and ceiling canopy are available in two finishes - brass for the more minimalist interiors and a brighter blue for bolder areas. Similarly, you can also choose between two diffuser sizes, with varying diameters.

The stem of the Luceplan Millimetro Suspension is available in a variety of lengths, please [contact us](#) for more information and pricing.
