PRODUCT DESCRIPTION

Designer: Carlotta de Bevilacqua

Artemide Architectural Sylt LED Track System

Sylt is a ceiling mounted, bendable powered profile that lets you draw light in space. The compact section installs as a continuous line that you curve on site to match architecture, then populate with ambient, accent and decorative modules. Combine Diffused Linear for general wash with Vector and Helgoland projectors for precise focus, then add Gople, Sphere, Unterlinden and La Linea to introduce texture and graphic emphasis, all within one coherent infrastructure across 2700K, 3000K or 4000K.

The system maintains electrical and mechanical continuity through curves for clean lines, fewer breaks and faster delivery on complex layouts. A broad finish palette, Aluminium, Black, Brass, Cobalt Blue, Copper, Silver and White, supports calm integration or expressive contrast across retail, hospitality, galleries, receptions and circulation.

As the official UK distributor, we can support you with the Artemide configurator and specification. Please note, as this product listing refers to a system with a range of possible configurations the price shown reflects a single unit with driver and may differ from the final quote. Contact us at artemide@davidvillagelighting.co.uk for further information.

PRODUCT SPECIFICATION

Light Source:	Available in 2700K, 3000K, or 4000K colour temperature. Wattage and lumen output vary by luminaire type.
IP Code:	20
