PRODUCT DESCRIPTION

Designer: Inma Bermúdez

Marset FollowMe LED Portable Lamp

The FollowMe Portable Lamp was designed over ten years ago by Inma Bermúdez. Its innovative, light, and compact design broke new ground in portable lighting. This new and updated version of the iconic lamp maintains the timeless essence of the original while bringing it up to date with advanced technological details.

The new FollowMe Portable Lamp features a progressive dimmer, allowing users to finely tune light intensity to suit their requirements. To adjust the warmth of light, it offers three colour temperatures: 2200K, 2700K, or 3000K. This high level of customisation allows the lamp to be adapted to the time of day, enhancing any environment. The newly optimised battery offers a dual recharging system. Charge via the included USB-C cable or charge using a charging base accessory (purchased separately).

The FollowMe Portable Lamp has been designed for use in residential or commercial spaces. Its easily transportable design is perfect for use throughout the home. The lamp's organic contours give it a timeless aesthetic, suiting a range of interiors, while the soft, diffused lighting adds a sense of calm to any space. Display in a bedroom, sitting room, or reading nook to create a cosy ambience. In commercial settings, the FollowMe is ideal for hospitality environments, adding a touch of charisma and warm, inviting lighting. A multi-cradle charging accessory (purchased separately) has been designed with commercial use in mind, allowing users to charge up to six units simultaneously.

A charging base is available to purchase separately. Please contact us for more information and pricing.
