PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Ginger 32C LED Ceiling / Wall Light

Marset Ginger 32C LED Ceiling / Wall Light is a mid-sized reflected light by Joan Gaspar for Marset. The circular diffuser sits away from the wall or ceiling, with the LED hidden behind it so the light is cast back onto the surface. The design keeps a very simple outline, but the thin diffuser and reflected light give it more depth than a flat surface light.

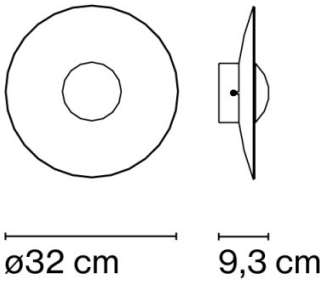

The 32C size is a useful middle option in the Ginger ceiling and wall range. It has more presence than the 20C, while still sitting close enough to the surface for hallways, bedrooms, living rooms, dining spaces, and lower ceilings. It can also be used as part of a two- or three-piece linked arrangement, connected to a single point of light with the correct joining accessories. The finish range includes wood and metal options, from Oak and Wenge through to Mauve, Sand, Stone Grey, Black / White, and Brushed Brass.

The integrated 2700K LED gives a warm reflected light with no exposed lamp. Ginger 32C is dimmable using leading-edge and trailing-edge dimming, and can be installed on either the wall or ceiling. Most suited to hallways, bedrooms, living rooms, dining rooms, entrances, hotels, restaurants, and commercial interiors where a shallow circular light can provide warm reflected light.

Please Note: To install the Marset Ginger LED Ceiling / Wall Light in linked arrangements of two or three fittings, joining accessories may be required. Please contact us for more information and pricing.
