PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Ginger 42C LED Ceiling / Wall Light

Marset Ginger 42C LED Ceiling / Wall Light is a larger ceiling and wall light by Joan Gaspar for Marset. The design uses a circular diffuser with the LED hidden behind it, casting light back onto the wall or ceiling for a warm reflected effect. In the wood versions, the diffuser is made from layers of wood and paper pressed under high pressure, allowing the shade to stay very thin while retaining the natural look of the material.

The 42C has more visual weight than the 20C and 32C, making it better suited to larger walls, wider hallways, living rooms, dining spaces, and commercial interiors. It can be used as a single fitting where one broad circle of reflected light is enough, or combined with other Ginger C sizes using the correct joining accessories. The finish range includes wood and metal versions, allowing the fitting to sit warmer, darker, softer, or more graphic depending on the selected finish.

The integrated 2700K LED gives a warm reflected light with no visible lamp. Ginger 42C is dimmable using leading edge and trailing edge dimming, and can be installed on either the wall or ceiling. Most suited to living rooms, dining rooms, hallways, bedrooms, entrances, hotels, restaurants, and commercial interiors where a larger low-profile light is needed.

Please Note: To install the Marset Ginger LED Ceiling / Wall Light in linked arrangements of two or three fittings, joining accessories may be required. Please [contact us](#) for more information and pricing.

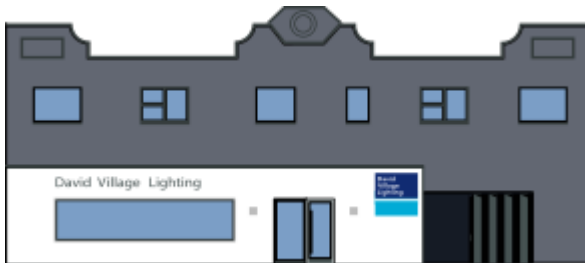

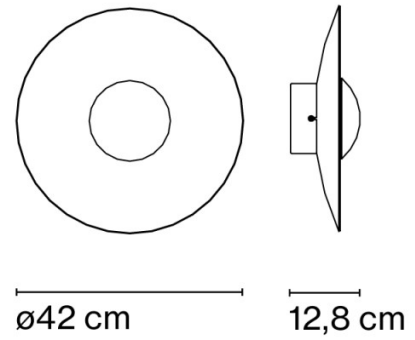

PRODUCT SPECIFICATION

Light Source: 19.71W, 2700K, 698 Lumens

IP Code: 20

Dimming: Dimmable using leading edge and trailing edge (Triac).

Dimensions: Shade: Ø42cm
Depth: 12.8cm
