PRODUCT DESCRIPTION

Designer: Daniel Lopez

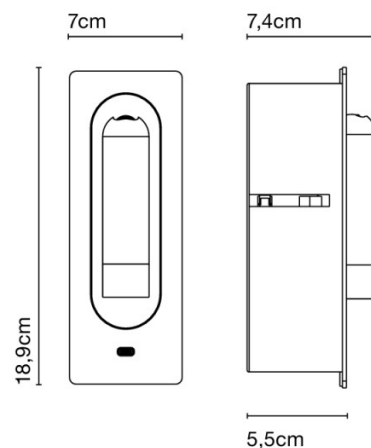

Marset Ledtube RSC USB-C LED Wall Light

Marset Ledtube RSC USB-C LED Wall Light is a recessed reading light by Daniel López, designed for bedside use with a USB-C port built into the face of the fitting. The tubular light folds back into the wall when it is not in use, keeping the area beside the bed clear. It has an injected aluminium structure and a transparent polycarbonate frontal piece, with a focused beam for reading.

The tube can be aimed in different directions, so the light can be positioned towards a book, bedside table, or seating position. When opened, the light switches on automatically, and when closed, it switches off again. The honeycomb grill helps control glare, making it useful where one person wants to read without disturbing someone else in the room.

Ledtube RSC USB-C is hardwired and available in Aluminium, Bronze, Matt White, and Matt Black finishes. The USB-C port makes the fitting useful in bedrooms, guest rooms, and hotel interiors where phone charging is needed beside the bed. Most suited to bedrooms, headboards, hotel rooms, guest rooms, serviced apartments, reading corners, and contract interiors where a recessed reading light and charging point are both required.

PRODUCT SPECIFICATION

Light Source: 5.2W, 2700K, 131 Lumens**IP Code:** 20**Dimming:** Integrated on/off switch on the product.**Dimensions:** Length: 18.9cm
Width: 7cm
