PRODUCT DESCRIPTION

Designer: Daniel Lopez

Marset Ledtube Mini Spot LED Wall Light

Marset Ledtube Mini Spot LED Wall / Ceiling Light is a compact directional light by Daniel López, developed as part of the Ledtube Mini range. It uses a small injected aluminium body with a focused LED beam, keeping the fitting small and practical where a reading or task light is needed. The 25° lens gives the fitting a narrow beam, while the honeycomb grill helps reduce glare.

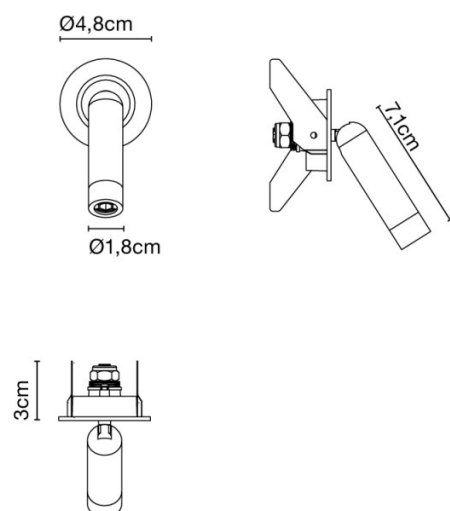

The Mini Spot can be installed on the wall or ceiling, giving it more flexibility than the standard Ledtube Mini wall version. It works well beside a bed, above a headboard, near a desk, or in a small seating area where the light needs to be aimed towards a specific point. Its compact form also makes it suitable for hotel rooms and contract interiors where more than one small directional fitting is needed.

Ledtube Mini Spot is hardwired and available in Aluminium, Bronze, Matt White, and Matt Black finishes. The integrated LED gives warm 2700K light, with a focused beam for reading and close task use. Most suited to bedrooms, headboards, bedside areas, desks, reading corners, hotel rooms, guest rooms, and contract interiors where a compact directional wall or ceiling light is needed.

PRODUCT SPECIFICATION
