PRODUCT DESCRIPTION

Designer: Patrick Norguet

Lodes Arrakis LED Outdoor Wall Light

Lodes Arrakis LED Wall Light was designed by Patrick Norguet in 2026 as part of the Lodes outdoor lighting collection. Its sinuous profile is formed from die-cast aluminium, with a finely ribbed surface that catches the light during the day. When illuminated, the fitting becomes less visually prominent, allowing its soft, diffused light to define the surrounding architecture.

Arrakis is available in Small and Large sizes, with each body positioned to direct light upwards or downwards. The modular system allows individual wall lights or double-body configurations, while the slightly offset mounting provides controlled illumination without emphasising imperfections in the wall surface. A transparent glass diffuser protects the integrated 2700K LED, available with either a Spot (18°) or Wide (36°) beam. The built-in driver versions support TRIAC dimming.

Arrakis comes in four finishes: Matte White, Matte Anthracite, Matte Champagne, and Natural Brown. Both sizes offer the same choice of optics, with a narrower beam for more focused illumination or a wider distribution across the wall. Rated IP65 for outdoor use, Arrakis can be installed beside entrances, along garden walls, or on building facades.

Please note, additional optic options, including Extra Wide, Elliptical, and Asymmetric, along with a double mounting bracket and alternative colour temperatures (2200K, 3000K), are available upon request. For further information and pricing, please contact us.

PRODUCT SPECIFICATION

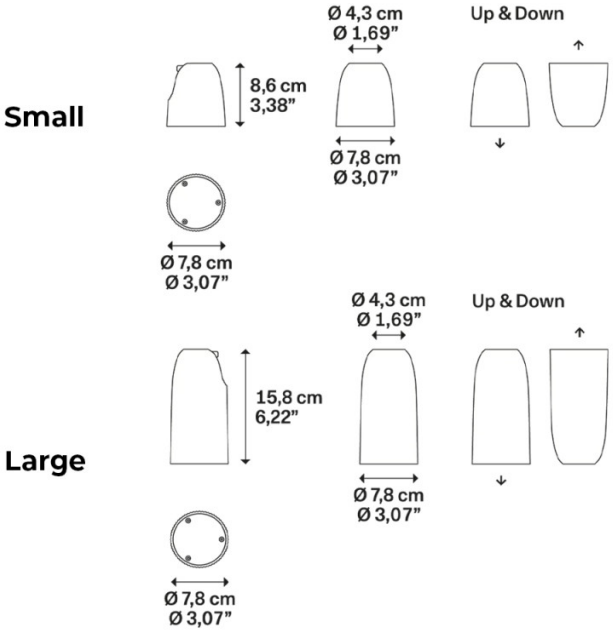

Light Source: 6.1W, 2700K, 500 Lumens

IP Code: 65

Dimming: Dimmable via Triac dimming.

Dimensions: **Small**:
Height: 8.6cm
Shade: Ø7.8cm

Large:
Height: 15.8cm
Shade: Ø7.8cm
