PRODUCT DESCRIPTION

Designer: Patrick Norguet

Lodes Kinno LED Outdoor Light

Lodes Kinno LED Outdoor Light takes its shape from a mushroom, with a broad cap and radial slats underneath. Designed by Patrick Norguet in 2025, the cap has an uneven edge that is more noticeable from the side. Seen from above, it looks almost circular.

Kinno offers several installation options, from direct surface mounting to straight or curved stems in 30cm, 60cm, and 90cm heights. The shorter stems keep the light close to the ground, while taller versions allow it to sit above planting. Kinno can also be mounted directly to walls and ceilings using the appropriate accessories. The built-in driver connects to a 220–240V supply and supports TRIAC dimming, with the integrated LED available in 2200K, 2700K, and 3000K.

Available in Matte Black, Matte Anthracite, Matte Champagne, Natural Brown, and Natural Green, the finishes draw from the colours of vegetation alongside more neutral tones. The IP67-rated light can be installed individually or repeated throughout landscaped areas to create a consistent lighting arrangement. Best suited to residential gardens, outdoor pathways, planted borders, and terraces, as well as landscaped hospitality spaces.

Please note, Kinno mounting accessories are sold separately. A 24V Remote Driver version is also available. For further information on mounting options, compatible drivers, and pricing, please contact us.
