PRODUCT DESCRIPTION

Designer: Patrick Norguet

Lodes Chelsie 140 LED Outdoor Wall Light

Lodes Chelsie 140 LED Wall Light is the largest fitting in Patrick Norguet's 2025 Chelsie collection. Designed to cast light onto the ground below, it has a round metal face with a shallow recess that hides the LED. The screw fixings are also concealed.

The larger Chelsie 140 provides a wide beam with greater light output than the compact step lights in the collection. Its 2700K LED produces a warm white, diffused light that softens contrasts and maintains a natural perception of outdoor spaces at night. The built-in driver version operates directly from 220–240V mains power and supports TRIAC dimming, allowing the light output to be adjusted.

Chelsie 140 is available in Matte Grey, Matte Black, Matte Anthracite, Matte Champagne, and Natural Brown. These finishes allow the fitting to complement or contrast with exterior wall materials, while its concealed light source maintains the clean appearance of the circular body. Best suited to residential entrances, garden walls, terraces, and outdoor pathways, as well as hospitality and commercial exteriors.

Please note, Chelsie 140 is also available in 2200K and 3000K, as well as a 24V version upon request. Smaller Chelsie 40 and 80 models, designed for step and pathway lighting, are also available and require a separate 24V remote driver. For further information and pricing, please contact us.

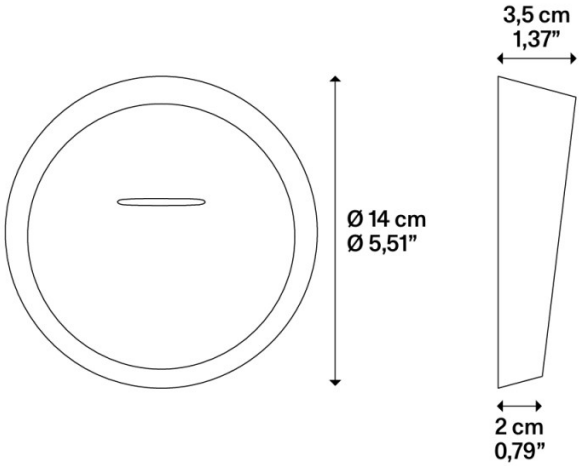

PRODUCT SPECIFICATION

Light Source: 2W, 2700K, 194 Lumens

IP Code: 65

Dimming: Dimmable via Triac dimming.

Dimensions: Fitting: Ø14cm
Depth: 2–3.5cm
Cable Length: 50cm
