PRODUCT DESCRIPTION

Designer: Will Earl

J. Adams & Co Strata 600 Wall Light

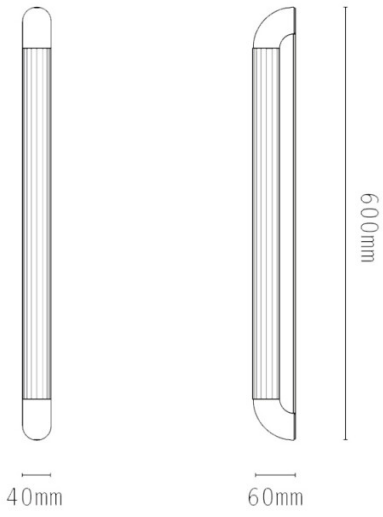

The J. Adams & Co Strata 600 Wall Light explores materiality and the beauty of light refraction through reeded glass, blending synergy and sophistication for an enchanting focal point that will elevate any space. The curved brass endcaps, available in Antique Brass, Bronze, Satin Brass, and Satin Nickel, house a precision-cut glass diffuser. To create the endcaps, brass is heated until malleable, then pressed between engraved dies to shape it. CNC machining ensures precision and structural integrity before each endcap is hand-finished, enhancing its character and the overall design.

The Strata Wall Light is rated IP44, making it suitable for bathrooms and wet rooms. When illuminated, the reeded glass diffuses light into a delicate decorative glow, perfect for creating an intimate, comfortable ambience. Install in a bedroom, dining room, living area, or bathroom to add an ornate, sophisticated touch to contemporary spaces.

The Strata Wall Light is also available in a larger size. Please contact us for more information and pricing.
