PRODUCT DESCRIPTION

Designer: Will Earl

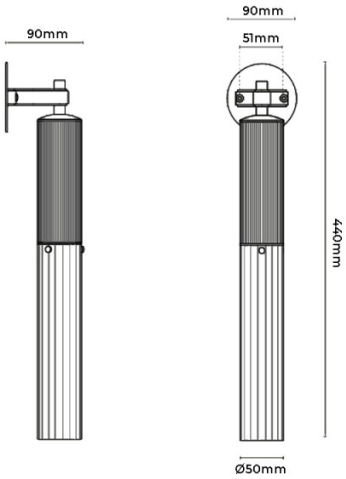

J. Adams & Co Flume LED Wall Light IP44

The J. Adams & Co Flume LED Wall Light is rated IP44, making it suitable for bathrooms and wet rooms. Its slender vertical profile draws inspiration from the Art Deco era, creating a refined aesthetic that feels both contemporary and timeless. The brass body is available in Antique Brass, Satin Brass, Bronze, and Satin Nickel finishes, and can be paired with either a clear or frosted reeded glass diffuser for a rich interplay of texture and material.

When illuminated, the fluted glass softly refracts the light to create a warm, decorative glow. A focused downlight complements the ambient illumination, making the Flume ideal for bedrooms and bathrooms alike. Install it individually as an elegant accent or arrange several together to create a sophisticated, intimate lighting scheme.
