PRODUCT DESCRIPTION

Designer: Giulio Iacchetti

Foscarini Magneto Table Lamp

As the name suggests the Magneto LED Table Lamp, designed by Giulio Iacchetti, makes use of a strong magnet to produce a stunning, innovative and modern lamp. The magnet sits on the side of the conical lampshade and makes the table lamp adjustable as you can slide the shade up and down the rod and rotate it to point the light where needed. The classic silhouette is reminiscent of a microphone or torch, being the perfect blend of modernity and tradition.

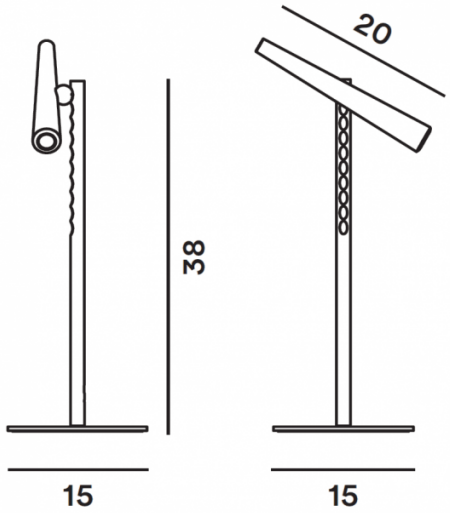

The Magento table light provides a direct, steady light perfect for reading or tasks, suitable for desks, tables, side tables and shelves. Use in bedrooms, offices, lounges and more to create a dynamic look and to provide a much-needed light. Available in 2 subtle colours of white or black, this table light will seamlessly fit into your interior and compliment almost any decor style.
