PRODUCT DESCRIPTION

Designer: Paolo Rizzatto

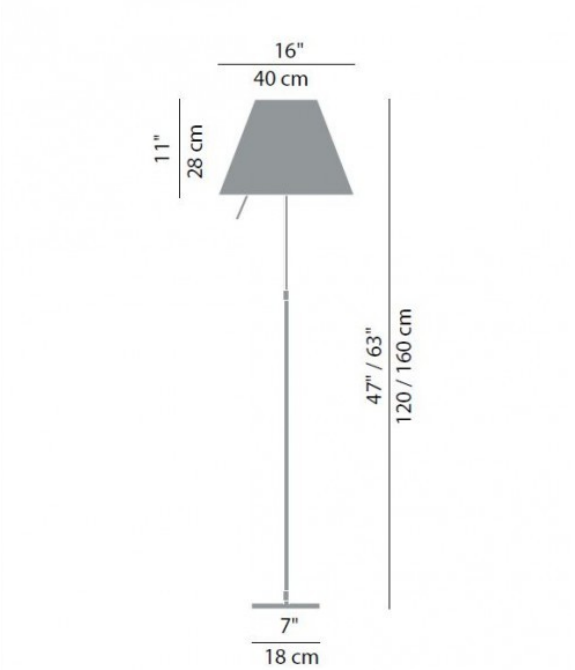

Luceplan Costanza Telescopic Floor Lamp

If you are looking for a stylish, personable and functional floor lamp for your space then look no further. The Luceplan Costanza Telescopic Floor Lamp includes telescopic height adjustment, and can vary its height from 120cm - 160cm, it is easy to adjust by loosening and tightening the bolt on the stem of the light as seen on the specification sheet. The base and stem of this lamp is available in either aluminium or black. Although designed in 1986, the Costanza has lost none of its charm today and still is a popular lighting solution for a range of interior styles.

As if it couldn't get any better, the Costanza Telescopic also features an interchangeable polycarbonate shade that is available in ten vibrant colours, all working as a functional diffuser, without losing too much light, and providing a warm and inviting ambience. The light is cast both upwards and downwards, ensuring your room is well illuminated without creating a harsh environment. The integrated dimmer also enhances these properties as it allows you to fully customise the light output and in turn, create an environment in your home or public space that represents your mood or desires.
