PRODUCT DESCRIPTION

Designer: Gianfranco Frattini

Artemide Megaron LED Floor Lamp

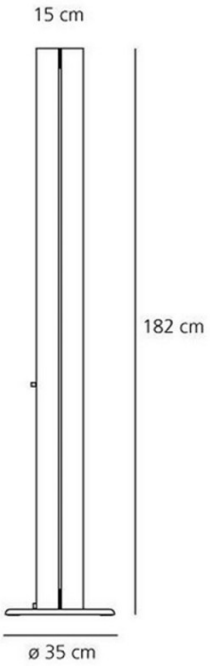

The Artemide Megaron Floor Lamp was originally a 1979 design by Gianfranco Frattini, an industrial designer, but has since been enhanced and is now fitted with an integrated LED light source for a more even illumination. A timeless design, this floor lamp adds a structural aesthetic to your space and emits an indirect uplight. Megaron is lso fitted with an integrated dimmer, allowing you to easily personalise the lighting emission. You can also choose between either a 2700K or 3000K colour temperature.

The Megaron LED Floor Lamp is available in a choice of sleek finishes that adapt to a variety of residential and commercial environments. A striking addition to living areas, receptions, lobbies, dining areas and entryways. Megaron can provide both functional and ambient lighting for your space.

To commemorate the 100th anniversary of Gianfranco Frattini's birth, Artemide has released a special edition red finish. The inscription "Gianfranco Frattini 100" is engraved on the upper part of the lamp, a subtle detail that pays tribute to a pivotal figure in Italian design.
