Centrelight Set 6 Wall Light

The Centrelight Set 6 Wall Light is a modular lighting solution, consisting of 6 pieces of oak, that are fitted together to create a unique constellation. The inner structure is composed of a metal tube finished in white paint, and each abstract shape is fitted with its own LED component. The illumination is projected backwards onto the wall and softly reflected back into the space, resulting in an ambient indirect glow that adds a calming ambience to a range of interiors.

Set 6 Wall Light can be installed either as a single wall light or as a light module with a sole connection point on the wall, which makes it easier to be installed in halls, offices, restaurants, and hotel reception desks and lobbies. Not only is this wall light functional, but it also adds a decorative touch to your space, offering a suggestive play of light and shadow around the organic shape of the diffuser.
