PRODUCT DESCRIPTION

Designer: Astro Design Team

Astro Elis Twin LED Exterior Wall Light

The Astro Elis Twin LED Exterior Wall Light is a compact architectural wall light designed to cast illumination both upwards and downwards. Its neat square form and integrated LED light source make it a practical choice for exterior walls, entrances and patios, while also allowing it to work well in bathroom settings where a more durable fitting is required. Available in textured black or solid brass, Elis Twin offers either a restrained modern finish or a warmer, more characterful material presence.

Rated IP54, Elis Twin is suitable for outdoor use as well as bathroom zones 2 and 3. The dual light output helps create both functional illumination and atmosphere, making it useful for highlighting walls, framing entrances and adding structure to a lighting scheme without relying on an exposed lamp.

Elis Twin includes an integrated 8.2W LED light source with a 3000K colour temperature and is supplied ready for wired wall installation. It is non-dimmable, suitable for mounting on flammable surfaces and finished with clear glass detailing. Please note that this fitting is not suitable for installation within five miles of the coast.

PRODUCT SPECIFICATION

Light Source: 8.2W, 3000K, 524 Lumens
