Marset Ginger LED Suspension

Marset Ginger LED Suspension is a reflected pendant light by Joan Gaspar, built around a thin circular shade with the light source hidden beneath it. In the wood versions, sheets of wood, paper, and resin are pressed together under high pressure to create a slim diffuser with a warm surface finish. The metal versions keep the same shallow shape, but give the pendant a cleaner and more sculptural appearance.

Ginger is available in four sizes, from the compact 20 through to the larger 60. The smaller sizes work well above bedside areas, small tables, counters, and kitchen islands, while the larger versions suit dining tables, seating areas, hospitality spaces, and rooms where the pendant needs more visual weight. The finish range includes Oak / White, Wenge / White, Brushed Brass, Brushed Brass / White, and Black / White, with a black electrical cord across the range.

The integrated 2700K LED gives warm reflected light with no exposed lamp. Ginger is hardwired and dimmable using leading-edge and trailing-edge dimming. Most suited to dining rooms, kitchens, bedrooms, living rooms, restaurants, hotels, bars, and interiors where a slim pendant can provide soft light over a table, counter, or seating area.

Please Note: Selected Marset Ginger LED Suspension sizes can also be supplied with DALI-2, 1-10V, 3000K, and Casambi options. Cluster accessories may also be available for multi-light arrangements. Please contact us for more information and pricing.
