PRODUCT DESCRIPTION

Designer: Poul Henningsen

Louis Polulsen PH 3½-3 Glass Pendant Light

The PH 3½-3 Glass pendant is based on a design by Poul Henningsen, who created a 3-shade system in the 1920s to provide effective, diffused lighting. The lampshade is made from white opal glass, which conceals the light source to create a uniform and even light distribution. The shade is paired with a sleek metal fitting, which is available in 3 finishes, black, chrome or brass.

This pendant is suitable for many applications, having a chic and vintage look that will add a touch of class to any setting. The PH 3½-3 pendant light creates a soft glow that directs horizontally and downwards, perfect for hanging over tables or for simply using as a main light in the room. You can use the pendant light alone for smaller spaces or put it into rows or clusters for bigger spaces. Suitable for both homes and commercial settings, being an iconic and classic fixture that will work well in any interior.
