PRODUCT DESCRIPTION

Designer: Simon Legald

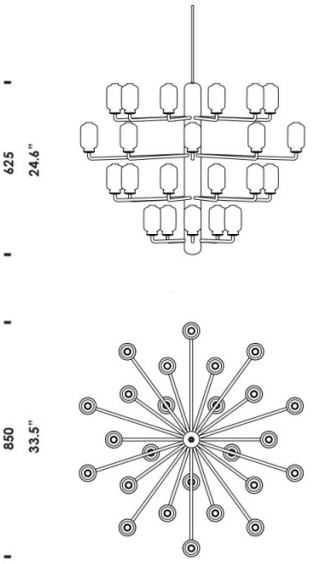

Normann Copenhagen Amp Chandelier

The Normann Copenhagen Amp Chandelier was created by Danish designer, Simon Legald in 2014. Amp Chandelier was inspired by old tube amplifiers from the 1960s, utilising numerous unique glass shades to provide bright and clear illumination to enhance your space. Each shade is attached to a marble arm which branches out from a cylindrical body. The marble adds a nostalgic aesthetic but with a contemporary twist. Each glass shade has been individually blown which creates the diffused effect.

Normann Copenhagen Amp chandeliers are perfect over dining tables to create a statement entertaining space. Amp's grand presence also lends itself to entranceways or atriums for a welcoming and dazzling greeting. A perfect feature for both commercial and residential settings, thanks to its classic and contemporary style. **Normann Copenhagen Amp Collection** also includes a wall light, a pendant and a table lamp.
