PRODUCT DESCRIPTION

Designer: BIG

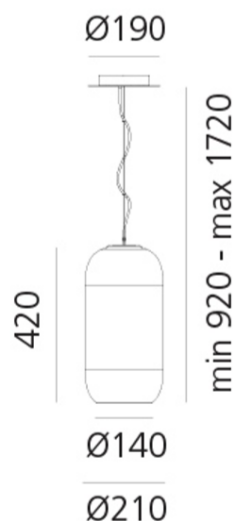

Gople RWB by Artemide

The minimal and elegant shape of the Gople enhances the beauty of the glass which is hand-processed according to an ancient Venetian technique, making each one unique. Gople RWB has one mesmerising finish option, smooth white. Glass finishing is designed to ensure the best relation with the emitted light, screening the source and maximising direct emission through transparency.

This version of the Artemide Gople comes with patented RWB light technology which helps plants grow, creates scenic or ambience effects and provides functional white lighting. An innovative light, friendly to both plants and our own well being.
