PRODUCT DESCRIPTION

Designer: Astro Design Team

Astro Trimless Square Twin Adjustable Recessed Light

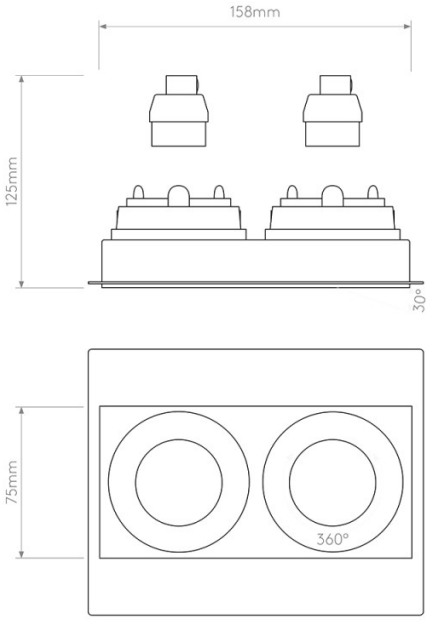

Astro Trimless Square Twin Adjustable Recessed Light is a Matt White twin recessed ceiling light for new ceiling installation before plastering. It combines two adjustable downlights within one square trimless fitting, giving more directional control than a single recessed light while keeping the ceiling finish clean.

Each light can be tilted by 30° and rotated through 360°, so the output can be aimed after installation. This makes the fitting useful where two areas need to be lit from one ceiling position, such as along a hallway, across a kitchen worktop, towards a wall, or within a larger room where directional control is needed.

The Trimless Square Twin Adjustable Recessed Light is wired in, dimmable depending on the lamps selected, and requires no separate driver. It must be installed before the final plaster skim and is not suitable for mounting on flammable materials. Most suited to kitchens, hallways, living rooms, bedrooms, and new ceiling schemes where twin adjustable recessed lighting is required.

PRODUCT SPECIFICATION

Light Source:	2 x Max 6W LED GU10 (Excluded)
