PRODUCT DESCRIPTION

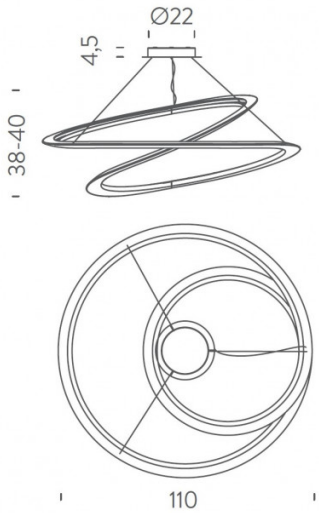

Designer: Arihiro Miyake

Nemo Lighting Kepler LED Pendant

Kepler is a stunning designer light, by Arihiro Miyake for Nemo Lighting. The pendant is available in a matt white, matt black, or gold painted finish and you choose the uplight or downlight version. The designer employed the mathematics for the Moebius ribbons to create the Kepler. Perhaps mathematics is also behind its name, after the German mathematician and astronomer. Kepler's shape is an endless line created with a 3D deformation process. You can install the Kepler above a dining table, in the living room as well as in hospitality and professional settings.
