PRODUCT DESCRIPTION

Designer: Arihiro Miyake

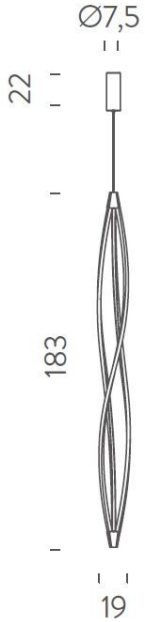

In The Wind Vertical by Nemo Lighting

As part of the In The Wind family from Nemo Lighting, this design by Arihiro Miyake is a progressive answer to how LED light sources can be shaped in modern light making. Made from aluminium, the metal of this pendant has been misaligned and twisted to create a light that puts curved lines at the forefront of its design, resulting in a thoroughly spectacular and striking pendant.

Suitable for lounge areas, due to its dimmable feature and warm diffused glow, this light could also work well in large, tall spaces because of its size, dramatic design and far-reaching brightness. With four colours available, the In The Wind Vertical Pendant is a perfect addition to any modern décor or contemporary space.
