Audo Copenhagen Reverse Table Lamp

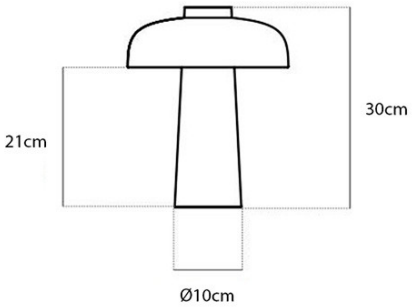

The choice and combination of materials in the Audo Copenhagen Reverse Table Lamp is what makes it stand out. Choose between either raw travertine or a smooth Carrara marble base; both materials are left as unprocessed as possible so that the light can highlight their natural imperfections. The bronzed aluminium dome shade is the finishing touch to the lamp's balanced expression, and the inner light source is projected down onto the surface below, creating a beautiful pocket of light. The illumination hits the body evenly, through the curved shade, and a game of light is initiated by the base itself.

The Reverse Table Lamp is equipped with a dim-to-warm LED light source, which allows you to adjust the colour temperature from warm to warmer, without changing the light intensity. The Audo Copenhagen Reverse is an excellent companion for your home, desk, office or any other surface. The option of dim-to-warm makes the Reverse light an excellent choice to meet any lighting expectations.
