PRODUCT DESCRIPTION

Designer: Philippe Starck & Eugeni Quitllet

Kartell Smart Wood K/Wood Chair

Designed by Kartell icon Philippe Starck, the K/Wood Chair is an innovative and current creation that makes use of sustainable and environmentally friendly wood. This design is part of the **Kartell Smart Wood Collection**, a range that is central to the “Kartell loves the planet” campaign. The project sees the company using sustainable and long-lasting materials to reduce waste and promote longevity in the world of furniture and lighting design.

The Kartell Smart Wood K/Wood Chair is made from a thin layer of 3D moulded Slatted Ash or Basic Veneer wood, using the latest technology to create a chair that is strong and comfortable whilst using the least amount of wood possible. This chair has a high back and curved arms, sculpted to provide comfort for your body. The chair comes with 2 options for wood finish and leg colour, and you can also choose between a wooden seat or a leather-upholstered seat for extra luxury. The K/Wood chair works wonderfully in a variety of settings and will prove to be a stylish and modern choice for your space.
