PRODUCT DESCRIPTION

Designer: Andrea Tosetto

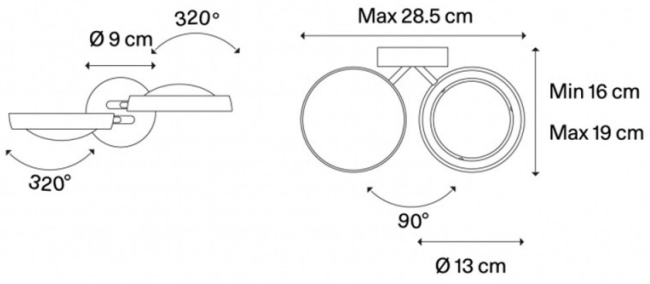

Lodes Nautilus Wall Light

The Nautilus Wall Light is an innovative, versatile light characterised by its convex lens. Designed by Andrea Tosetto to satisfy a range of lighting needs, the Nautilus features an adjustable frame for personalised lighting. The movable lens can also be rotated on its axis to direct light precisely where required. The convex lens creates a wide spread of light, suitable for both functional and decorative lighting.

The Nautilus Wall Light features two integrated LED sources, available in 2700K (warmest white) and 3000K (warm white) for a light temperature to suit any environment. The compact size of the wall lamp makes it suitable for a wide range of spaces. Create a dynamic display by installing multiples to line the length of a hallway or in a gallery to illuminate pieces of art. Available in Matte Black, Matte White, or Matte Champagne, the Nautilus Wall Light blends seamlessly into contemporary spaces for a minimalistic yet impactful lighting scheme.
