Lodes Nautilus Mini Wall Light

Part of the Lodes Nautilus Collection, the Nautilus Mini Wall Light is an innovative lighting solution that suits both large and small spaces. The Nautilus is characterised by its flexibility as well as its convex lens that creates functional yet personalised light. With its ability to be moved up and down, as well as rotated up to 355° on its axis, the wall light creates directional light that can be pointed precisely where required. When illuminated, the convex lens spreads light into a wide beam that bathes the surrounding wall in a warm glow.

The Nautilus Mini Wall Light is available with two colour temperatures: 2700K or 3000K. This warm lighting creates a cosy and welcoming atmosphere in any setting. With a choice of three sophisticated finishes, Matte White, Matte Black, or Matte Champagne, the Nautilus blends seamlessly into contemporary spaces. Its compact design has been created to be installed in multiples, in pairs to frame a bed or doorway, or in a row lining the length of a long hallway.
