Bocci 57t Table and Wall Light

Designed by Omer Arbel, the Bocci 57t Table and Wall Lamp is made through exploration of a special technique that is usually used for making closed-cell foam. Voids of air are trapped in a glass matrix, leading to unusual and irregular shapes in the glass sphere. When turned off, the Bocci 57t lamp is mysterious, hiding its shape, and then when turned on, the glow permeates out to reveal the interesting silhouette. Each lamp is therefore unique as the process produces the shapes at random.

The 57t table lamp can also be used on the wall with a handy notch on the back of the switch and the base to attach it. The 57t wall and table light is available in 3 lovely finishes: grey, dark mirrored or white opaline and all emit a soft glow. The grey and dark mirrored finishes create a gorgeous amber colour when switched on, being a magnificent transformation, with the white opaline creating a more steady yellow glow. Use in many spaces to provide a warm atmosphere and create the ambience you want with the convenient dimmer switch, which opens and closes for control.

Please Note: The Bocci 57t Lamp can not be hard-wired when assembled on the wall, so must be installed near a socket.

PRODUCT SPECIFICATION

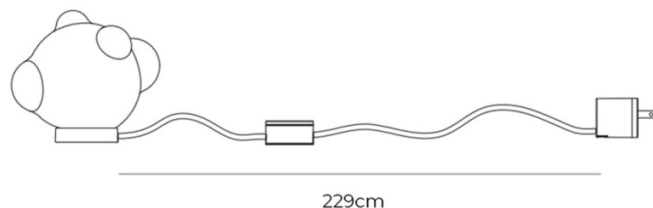

Light Source: 1.5W, 2500K, 130 Lumens

IP Code: 20

Dimming: In-line dimmer included on cable.

Dimensions: Shade: Ø10cm-16.5cm
Base: Ø7.5cm
Cable Length: 229cm

Ø10cm-Ø16.5cm
