PRODUCT DESCRIPTION

Designer: Poul Henningsen

PH 4½-4 Glass Pendant Light by Louis Poulsen

The PH 4½-4 Glass pendant has a lampshade design based on a logarithmic spiral, which works to conceal the light source to create a glare-free and even glow throughout the room. This design was first created by Poul Henningsen in the 1920s, whose 3 shade system has now been used for many different models throughout the decades.

This pendant light was first introduced in 1980 and is a perfect choice for all of your lighting needs. The PH 4½-4 Glass pendant light provides both a direct and overall illumination that can be used for many functions in your interior. Use as a main light or buy multiple to put in rows to hang over tables. Suitable for homes or commercial spaces, this pendant will add an elegant and functional touch to the room.

Please note, this product is currently subject to an extended lead time of up to 12 weeks.
